

Colorbond®

Made for Australia

Guttering

A perfect match rain or shine

BLUESCOPE
STEEL

Works beautifully in Australia's harsh conditions.

Tips for choosing colour

- Start at the top. Consider the colour of roofing and guttering when designing your overall colour scheme.
- Wherever possible downpipes should blend with your walls. Choose a colour that best matches the colour of your home so they are less noticeable.

Perfect match
to your roof

Strength and

Gutters and downpipes don't just add an attractive finish to your home, they can protect your home from serious storm water damage. That's why it's so important to use guttering, fascia and downpipes made from genuine COLORBOND® steel – tried and tested for Australia's harsh conditions.

Made for Australia

For over 45 years BlueScope Steel scientists have tested COLORBOND® steel in some of Australia's harshest climates. So you have peace of mind knowing COLORBOND® steel is designed and manufactured by BlueScope Steel to help withstand everything from drenching downpours to scorching sun. Rest assured that COLORBOND® steel meets relevant Australian Standards.

Take a weekend off

You can rest easy when you choose rainwater products made from COLORBOND® steel. Their proven durability and low maintenance means they will perform for years to come – giving you the time to enjoy your home.

Look for the brand

When you buy gutters, fascia and downpipes made from COLORBOND® steel from your supplier, be sure to look for the brand as not all painted steel is genuine COLORBOND® steel.

Your choice of profiles

Guttering made from COLORBOND® steel comes in a wide range of styles, sizes and profiles (or shapes) and downpipes are available in round or rectangular profiles.

These profiles and styles match beautifully with fascia and roofs made from COLORBOND® steel.

Backed by BlueScope Steel

Gutters, fascia and downpipes made from genuine COLORBOND® steel are backed by BlueScope Steel with a warranty* of up to 20 years.

Rigorous testing

Advanced technologies and stringent research help ensure COLORBOND® steel performs well even in a climate like ours.

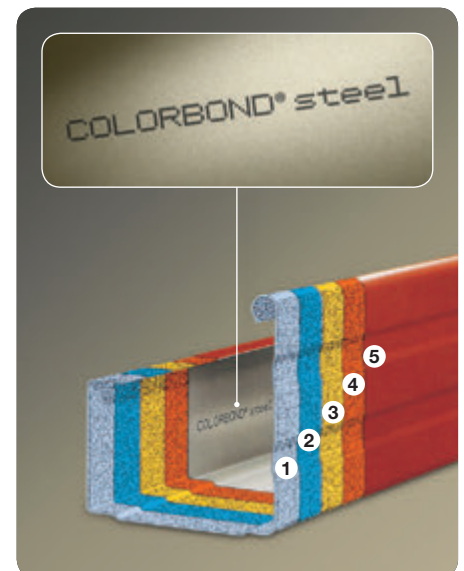

Why is COLORBOND® steel so tough?

Genuine COLORBOND® steel is made for Australian conditions from start to finish, using an advanced 5-step process to ensure it lasts beautifully.

- 1 Structural steel base compliant with Australian Standard AS1397.
- 2 Zinc aluminium alloy coating compliant with Australian Standard AS1397.
- 3 Conversion coating.
- 4 Corrosion inhibitive primer.
- 5 High performance oven cured exterior paint finish compliant with Australian Standard AS2728.

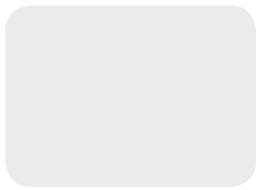

A CORSTRIP® film offers protection during installation to leave a pristine finish.

We've got a name for beautiful colours
